

TAT EXPORT & IMPORT

Company

About us

Established in 2011, our company's expert staff was established with a team with extensive experience in domestic and foreign trade.

FMCG: We are developing our organization in the international market with private label, except that we can bring all kinds of brands, product groups or products to companies abroad within the scope of Fast-Moving Consumer Goods.

We are of the opinion that the most important factor is to do the work with pleasure in order to realize sustainable trade. We would like to state that the most important element that unites us is to embrace our work and to love our industry.

As Tat Import Export team; We believe that loving our job combined with experience creates an active and dynamic structure and imposes new visions on us.

We are trying to be a team that has a professional and institutional infrastructure and works with an amateur spirit.
