Design Checklist

Please ensure that all logos, illustrations, images and fonts are included in the file.
All non-vector images must be CMYK and high resolution.
The pantone codes you provide must consist of Solid Coated colors.
If you do not provide the fonts of the text in the design, make sure that the text is embedded and converted to vector to avoid distortions.
If your design needs to be matched with a color at the printing stage, please send us samples.

Mold Type	SW
Mold Size	8 OZ

▬▬▬	Bleed
▬▬▬	Cutting Line
▬▬▬	Grid Lines
▬▬▬	Visible Part of the Design

Reminder:
A color band that goes completely around the cup may not merge completely due to movement while the cup is being created.

In order for your designs and texts to be correct when they are produced, their slopes must comply with the guide lines.

Pasting Area Must Remain Empty.

Caution: Hot Content!

Pasting Area Must Remain Empty.

The yellow area between the outer blue line and the inner red line is the bleed. Allow bleed to this area.

Blue lines are knife marks. Shows where to cut the design.

The pink areas on the glass represent the front, back and middle face.

The red line shows the area where the design will be limited. The area within the red line is the part that will be visible on the glass.
