# Ease of Use & Storage

## Space-Saving Storage

Our flat-pack design minimizes storage space requirements in your bakery. Boxes arrive flat and can be stacked efficiently until needed, freeing up valuable space for other operations. Standard cases contain 25-50 units depending on box size.

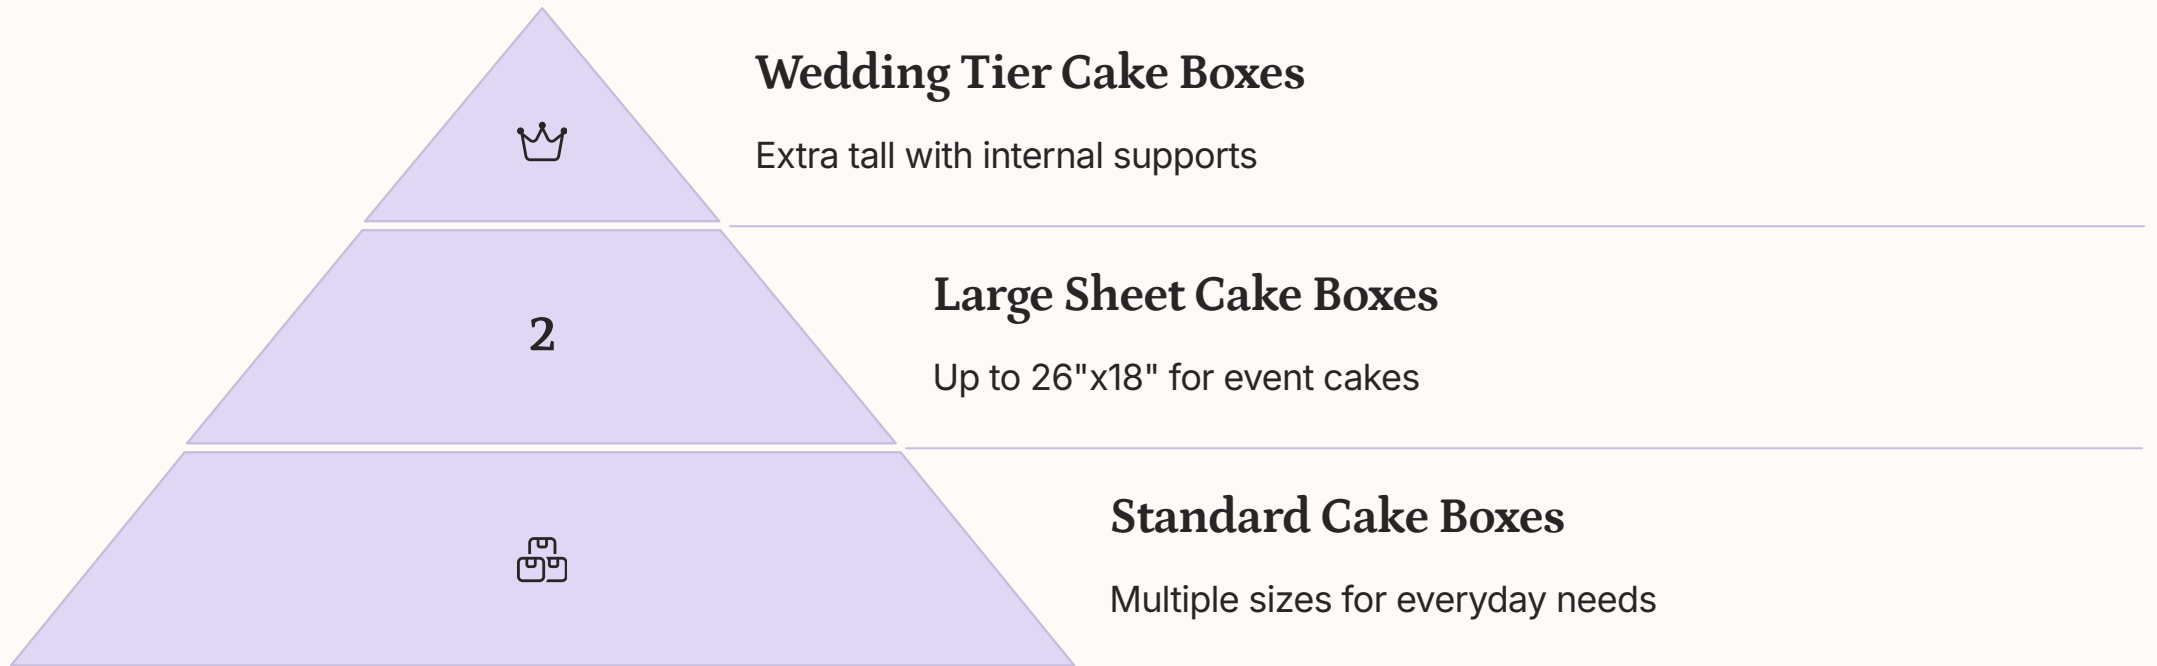

For businesses with extremely limited storage, our just-in-time delivery options ensure you maintain adequate packaging inventory without sacrificing space.

Our innovative designs prioritize the needs of busy bakery environments, where space and time are precious commodities. Choose between pop-up styles for instant assembly or flat-pack options for efficient storage.

Designed with bakery workflows in mind, our boxes assemble in seconds without tools or training. The intuitive folding mechanisms lock securely in place, providing confidence that your creations will remain protected from bakery to customer.

# Sheet Cake & Specialty Boxes

Special occasions demand special packaging solutions. Our sheet cake and specialty boxes are engineered to handle the unique challenges of transporting large-format baked goods. With dimensions up to 26"x18"x5.5", these boxes provide the necessary surface area for elaborate sheet cakes while maintaining structural integrity.

For wedding cakes and other multi-tiered creations, we offer specialized boxes with additional height and internal support structures. These boxes ensure that even the most elaborate creations arrive at their destination in perfect condition.
